

BLACK ROCK DESERT
HIGH ROCK CANYON
EMIGRANT TRAILS

NATIONAL CONSERVATION AREA

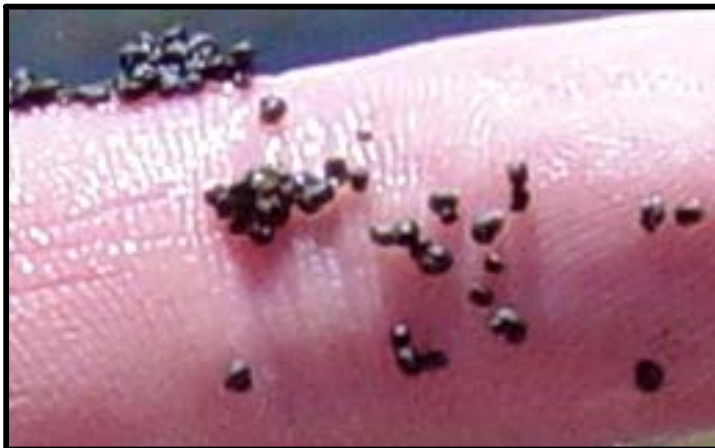

SOLDIER MEADOWS

Matthew Varner
BLM (2004)

Scientific Name:
Pyrgulopsis notidicola

- SPECIES OF CONCERN
- Small freshwater spring snail
- Only found in a 984 foot (300 m) stretch of a single thermal spring and its associated outflow... That's it!

- Primary threat is the alteration and degradation of its habitat by recreational users that come to the spring to bathe
- Visitor use has increased in the past decade due to the increased awareness of the area and the recent designation of it as a National Conservation Area

Elongate Mud Meadows Pyrg

All information gathered from: *Historic Context for the Soldier Meadows Basin*, by Dave Valentine.
